

The Vienna Institute for International Economic Studies (wiiw) is one of the principal centres for economic research on Central, East and Southeast Europe with more than 40 years of experience. We have expanded our work on European integration issues more generally encompassing the new member states of the European Union, but also developments in the Wider European region and its neighbourhood. We provide economic analysis, forecasts and statistical data for our clients and stakeholders. We currently maintain three economic databases and regularly use quantitative methods in our analysis.

We are looking for a

STATISTICIAN

Major tasks:

- Creation and update of time series of economic indicators for the institute's proprietary databases
- Research in international databases for appropriate indicators, download of data, calculations, statistical and econometric support of the analytical work of the economists
- Presentation of data in tables and graphs
- Attention to methodological comparability in all data work
- Contribution to internal projects by the statistics department

Requirements:

- BA or MA in statistics or business information systems
- Affinity to numbers, attention to detail, structured work habits
- Understanding of and interest for economic indicators
- Very good knowledge of MS-Office, in particular Excel, Word and Excel graphics and PowerPoint; Knowledge of Stata or comparable programming skills necessary (e.g. 'R')
- Very good language skills in English and basic knowledge of German are required; knowledge of a Slavic language is welcome
- Ability to work in teams

The position is for 40 hours per week. Remuneration for this position will be EUR 31.000 or above, depending upon qualification.

Starting date: September 2016

If you are looking for an interesting and challenging position in an international team and good working conditions you should apply.
