

# wiiw Database on Foreign Direct Investment in Central, East and Southeast Europe

**May 2009**

This CD-ROM contains the *wiiw Database on Foreign Direct Investment in Central, East and Southeast Europe*.

The CD-ROM starts with the HTML format. From here you can retrieve all data either in HTML, in MS Excel or in CSV format. To save files (PDF, Excel or CSV) to your disk, please right click on the link and choose "Save target as...".

In case the CD-ROM does not start automatically with the HTML format, please open "**index.html**" on the CD from any browser (e.g. Internet Explorer, Mozilla Firefox, Opera, Netscape, SeaMonkey, Konqueror, etc.).

The content has been optimised for a screen resolution of 1024\*768 and tested with current browsers. However, Internet Explorer 6 doesn't support fixed areas, therefore the title row of the data table containing the years/countries won't stay fixed.

For reading the Database description and methodology, abbreviations and sources as well as the PDF version of the wiiw Database on Foreign Direct Investment you need the Adobe-Acrobat Reader.

In case the Adobe-Acrobat Reader is not installed on your Windows PC, you can do this by navigating into the **directory AReader** and starting the setup file "**AcrobatReader812\_en.exe**". For older Windows versions (e.g. Windows 95/98/ME) please start the file "**AcrobatReader51\_en.exe**".

The 3 files: readme.txt, readme.doc and readme.pdf contain the same information.

If you have suggestions for future versions of the FDI CD or any technical questions, please contact

Johannes Pöschl ([poeschlj@wiiw.ac.at](mailto:poeschlj@wiiw.ac.at))
